

The 2011 Geophysical Directory

Sixty-Sixth Edition

Completely Revised

The original Geophysical Directory published annually since 1946

A year of changes -

Personnel involved in contacts outside the company should have fresh, accurate information. Each company listed has been contacted to insure the accuracy of their listing.

A worldwide reference to companies, along with key personnel, that provide or require, geophysical equipment, supplies, and services.

The directory has the names, addresses, phone numbers, fax numbers, email addresses and website information for 4,581 offices and branch offices.

The personnel associated with the headquarters and branch offices are listed under their respective locations. Titles with the names indicate their responsibilities.

The Company Name Cross Reference section lists company name changes occurring since 1950, providing traceability through buy outs and mergers. Indicated are the companies involved and the year the change occurred. This section has over 4000 entries.

The Geophysical Directory has been published by the same people since the first issue in 1946. The same high standards for accuracy and thorough research, that made the Geophysical Directory the standard reference for the industry, exist today.
